

【DOCUMENT NAME】 ABSTRACT

【ABSTRACT】

【PROBLEM】

5 The present invention to provide a polyester fabric
which is light in weight, high in density and flexible and,
at the same time, has a sufficient level of tear strength,
by using extra-fine polyester multifilaments finer as com-
pared with the conventional polyester multifilaments.

【MEANS TO SOLVE】

10 A polyester fabric having a total cover factor of not
lower than 1500 and a mass per unit area of not higher than
45 g/m²,

 wherein said polyester fabric is composed of polyes-
ter multifilament A yarns having a total fineness of not
15 higher than 25 dtex (decitex) and a single yarn fineness of
not higher than 2.0 dtex and multifilament B yarns having a
total fineness of not lower than 35 dtex,

 wherein the arrangements of the respective yarns in
the warp and weft directions are such that the yarn consti-
20 tution ratio "B yarn/A yarn" is 1/4 to 1/20 (number of
yarns-to-number of yarns ratio) and
wherein the A yarn-to-B yarn pitches are not longer than 7
mm.
